# Engraving For Laser Printers

Our engraved cotton-fiber papers will run in your high-speed laser printer.

No ifs, ands or buts...We guarantee it!

It's a fact. When the engineers designed these modern, high tech laser printers, they didn't consider the needs of a typical law office. Needs such as wanting to use fine papers and engraved stationery in their laser printers.

We solved all of the problems.

**The Paper.** Our 100% cotton fiber Sheffield® Linen paper and our 25% cotton fiber Perfect Image™ paper were engineered specifically to run on these touchy printers.

**The Ink.** We use specially formulated, fast-cure heat resistant inks that will not melt in the high fuser temperatures associated with laser printing.

**The Manufacturing Know-how.** We utilize a light bruising technique to ensure that engraved stationery will flow through the paper path of laser printers without jamming.

This is why only All-state, America's largest engraver for the legal profession, can guarantee its engraved stationery for use on laser printers.

For samples of these fine papers, engraved specifically for use on any laser printer, or any printer for that matter, simply call or write to us and we'll be happy to send you our *Paper and Engraving Sampler Kit*.
